

Investor Overview Presentation

Caution regarding forward-looking statements

From time to time, the Bank makes written and/or oral forward-looking statements, including in this presentation, in other filings with Canadian regulators or the U.S. Securities and Exchange Commission, and in other communications. In addition, representatives of the Bank may make forward-looking statements orally to analysts, investors, the media and others. All such statements are made pursuant to the "safe harbour" provisions of, and are intended to be forward-looking statements under, applicable Canadian and U.S. securities legislation, including the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements include, but are not limited to, statements regarding the Bank's objectives and priorities for 2011 and beyond and strategies to achieve them, and the Bank's anticipated financial performance. Forward-looking statements are typically identified by words such as "will", "should", "believe", "expect", "anticipate", "intend", "estimate", "plan", "may", and "could".

By their very nature, these statements require the Bank to make assumptions and are subject to inherent risks and uncertainties, general and specific. Especially in light of the uncertainty related to the financial, economic and regulatory environments, such risks and uncertainties – many of which are beyond the Bank's control and the effects of which can be difficult to predict – may cause actual results to differ materially from the expectations expressed in the forward-looking statements. Risk factors that could cause such differences include: credit, market (including equity, commodity, foreign exchange, and interest rate), liquidity, operational, reputational, insurance, strategic, regulatory, legal, environmental, and other risks, all of which are discussed in the Management's Discussion and Analysis ("MD&A") in the Bank's 2010 Annual Report. Additional risk factors include the impact of recent U.S. legislative developments, as discussed under "Significant Events in 2010" in the "How We Performed" section of the 2010 MD&A; changes to and new interpretations of capital and liquidity guidelines and reporting instructions; increased funding costs for credit due to market illiquidity and competition for funding; and the failure of third parties to comply with their obligations to the Bank or its affiliates relating to the care and control of information. We caution that the preceding list is not exhaustive of all possible risk factors and other factors could also adversely affect the Bank's results. For more detailed information, please see the "Risk Factors and Management" section of the 2010 MD&A. All such factors should be considered carefully, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements, when making decisions with respect to the Bank and we caution readers not to place undue reliance on the Bank's forward-looking statements.

Material economic assumptions underlying the forward-looking statements contained in this presentation are set out in the Bank's 2010 Annual Report under the headings "Economic Summary and Outlook", as updated in the Third Quarter 2011 Report to Shareholders; for each business segment, "Business Outlook and Focus for 2011", as updated in the Third Quarter 2011 Report to Shareholders under the headings "Business Outlook"; and for the Corporate segment in the report under the heading "Outlook".

Any forward-looking statements contained in this presentation represent the views of management only as of the date hereof and are presented for the purpose of assisting the Bank's investors and analysts in understanding the Bank's financial position, objectives and priorities and anticipated financial performance as at and for the periods ended on the dates presented, and may not be appropriate for other purposes. The Bank does not undertake to update any forward-looking statements, whether written or oral, that may be made from time to time by or on its behalf, except as required under applicable securities legislation.

Solid Financial System in Canada

Strong retail and commercial banks

- Conservative lending standards
- All major wholesale dealers owned by Canadian banks, with stable retail earnings base to absorb any wholesale write-offs

Responsive government and central bank

- Proactive policies and programs to ensure adequate liquidity in the system
- Updated mortgage rules moderate the market and protect consumers

Judicious regulatory system

- Principles-based regime, rather than rules-based
- One single regulator for all major banks
- Conservative capital rules, requirements above world standards
- Capital requirements based on risk-weighted assets

The world's soundest banking system¹

Canadian Mortgage Market is Different from the U.S.

	Canada	U.S.
	 Conservative product offerings: fixed or variable interest rate option 	 Outstanding mortgages include earlier exotic products (interest only, options ARMs)
Product	 Default insured mortgages use a 5-year fixed qualifying rate for loans with variable rates or terms less than 5 years 	■ Borrowers often qualified using discounted teaser rates → payment shock on expiry (underwriting standards have since been tightened)
	 2% of the mortgage credit outstanding estimated to be non-prime 	 10% of mortgage credit outstanding estimated to be non-prime
	 Terms usually 5 years or less, renewable at maturity 	30 year term most common
Underwriting	 Maximum amortization is 30 years and maximum loan to value to 85% on refinance transactions 	 Amortization usually 30 years, can be up to 50 years
	 Mortgage insurance mandatory if LTV over 80%, covers full loan amount 	Mortgage insurance often used to cover portion of LTV over 80%
Regulation and	Mortgage interest not tax deductible	 Mortgage interest is tax deductible, creating an incentive to borrow
Taxation	 Lenders have recourse to both borrower and property in most provinces 	 Lenders have limited recourse in most jurisdictions
Sales Channel	External broker channel originated up to 30%	 External broker channel originated up to 70% at peak, now less than 30%
