## TD Covered Bond (Legislative) Programme Monthly Investor Report

Calculation Date: 31-Oct-14  
Date of Report: 13-Nov-14

### Indexation Methodology

As of the date of this Investor Report, the Guarantor employs the following methodology to determine indexed valuations for Properties in the Covered Bond Portfolio for reporting as of a date on or after 1 July 2014 (which methodology is, as of the date hereof, the "Indexation Methodology") for purposes of the Asset Coverage Test, the Amortization Test, the Valuation Calculation and for other purposes required by the CMHC Guide. Changes to the Indexation Methodology may only be made (i) upon notice to CMHC and satisfaction of any other conditions specified by CMHC in relation thereto, (ii) if such change constitutes a material change, subject to satisfaction of the Rating Agency Condition, and (iii) if such change is materially prejudicial to the Covered Bondholders, subject to the consent of the Bond Trustee. The Indexation Methodology must at all times comply with the requirements of the CMHC Guide.

The indices used by the Guarantor to determine the current market value of a Property are calculated using a time series of seasonally-adjusted resale home prices (the "HPI Data") generated by The Canadian Real Estate Association ("CREA"). At this time, the HPI Data is available for the following metropolitan areas: Calgary, Edmonton, Halifax-Dartmouth, Hamilton-Burlington, Kitchener-Waterloo, London & St. Thomas, Ottawa-Carleton, Regina, Saint John, Saskatoon, St. Catharines & district, Sudbury, Thunder Bay, Toronto, Greater Vancouver, Victoria, Windsor-Essex and Winnipeg. An index calculated based on the HPI Data for each such metropolitan area is referred to herein as a "Metropolitan HPI". The HPI Data is also available at a provincial level for each province of Canada. An index calculated based on the HPI Data for a province is referred to herein as a "Provincial HPI".

The HPI Data is available by subscription from CREA at <http://crea.ca/statistics>. This website and its contents do not form part of this Investor Report.

A three step process is used to determine the current market value for each Property subject to the Related Security in respect of the Loan. First, a code (the Forward Sorting Area) which identifies the location of the Property is compared to corresponding codes published by Canada Post that groups properties into the areas covered by the HPI Data. Second, the rate of change for the applicable area is used to calculate a house price index factor (the "HPI Factor"). In order to calculate the applicable HPI Factor, if the Property is located within an area covered by a Metropolitan HPI, the applicable Metropolitan HPI will be used and if the Property is located outside of the areas covered by the Metropolitan HPis, the applicable Provincial HPI will be used. Finally, the current market value is then determined by adjusting the original valuation for such Property, by applying the corresponding HPI Factor from the date of the original valuation to the date on which the latest valuation is being adjusted for purposes of determining the current market value for such Property. In instances where the original valuation in respect of such property pre-dates the first available date for the relevant rate of change in the HPI Data, the first available date for such rate of change is used to determine the rate of change to apply to adjust the latest valuation for purposes of determining the current market value for such Property. The process is repeated at least quarterly.

Material risks associated with using the Indexation Methodology include, but are not limited to, the accuracy and completeness of the HPI Data being used to calculate the Metropolitan HPis and the Provincial HPis, the continued availability of the HPI Data, the risk that the HPI Data does not account for differences in property value changes based on property type, and, in the case of Properties located outside of the areas covered by the Metropolitan HPis, the risk that the Provincial HPis may not accurately capture unique factors affecting local housing markets.

The HPI Data is made available by CREA to The Toronto-Dominion Bank (the "Bank") on an "as is basis" without warranty of any kind including all implied warranties and conditions of merchantability, fitness for a particular purpose, title and non-infringement. CREA makes no representations about the suitability of the HPI Data. CREA shall not be liable for any direct, incidental, consequential, indirect or punitive damages arising out of the Bank's access to or use of the HPI Data.
